F118 Series Media Air Cleaners

Honeywell

Honeywell Commercial Air Products Featuring Hepa-Flow CPZ[™] Technology

The F118 is a highly effective, cost efficient system for capturing airborne particles and VOCs in your facility

- Specifically designed for commercial drop ceilings with tight clearances, the F118 media air cleaner fits neatly into any twoby-four foot drop ceiling opening.
- This attractive white grille blends into any décor, making the F118 especially suitable for areas where cleaner air and aesthetics are important.
- The one-piece grille swings down for easy access to the prefilters, media filters and sorbent media. The grill is removable for ease of cleaning.
- A three-speed forward curve directdrive maintenance free motor and efficient Coanda airflow, combine to re-circulate filtered air throughout the room.

• Choose 95% at 0.3 efficiency hospital-grade filters, along with CPZ[™] sorbent media, to help capture particles and reduce odors, gases and VOCs.

Particles aren't always the problem

Anywhere gases, odors and volatile organic compounds (VOCs) are a part of doing business – you'll want an air cleaner that includes CPZ[™] sorbent media. Depending on your particular application, we can adjust the CPZ[™] formula to solve your specific need. Honeywell CPZ[™] sorbent media is specifically formulated for maximum efficiency at reducing a broad range of gases-odors-VOCs.

Applications

You will find the F118 Media Air Cleaner where particle counts are typically high and odors are present due to the nature of your business, and where both aesthetics and efficiency are important.
